Alan,

Thanks for the heads up about the area. I would like a report in two weeks.

Calvin

Calvin,

Thank you for sharing our this request. On a cursory view, this is an area which has high EJ issues. When would you like an EJ screen report? Also, recognizing the EJ issues which exist, it would be great to be included as the permitting process moves along.

Subject: EJ Screen Request

Hi Alan and Ruben,

I have another Underground Injection Control (UIC) permit project that needs an EJ screen report. Clean Energy Systems (CES) proposes to construct a Class VI injection well for geological sequestration at its Mendota energy plant. The permit, if issued, would be valid for the project lifetime. The well to be permitted will be located at:

Clean Energy Systems – Mendota Site
400 Guillen Parkway
Mendota, CA 93640-0099

The permit application uses a radius of 2.5 miles from the proposed well for area of review. Attached is a location map with the area of review.

Thanks,
Calvin
